

When you download an application, it may happen that the computer tells you that the program may endanger your computer. Do not worry, it's because the file is in the format of ".exe" and antivirus programs automatically identify all programs as follows.

(these sample Fig. is the system Windows 8th)

It will report that your computer may be at risk if the program you download, then click Next.

Click "yet run" and follow the installation instructions.

How to run a program, update and serial number:

See below!!!!!!

When you place your cursor over the letters, the letter can be found below each example for example.: manual, license, place the serial number,etc.

1. Under the letter T you will find multimedia TESTS
2. Under the letter A you will find multimedia Alfabet book

When you start the program window may appear with different messages regarding program updates.

What to do: see image A.

1. Press the "OK" and everything is updated.
2. If after startup screen says that "server connects" you probably have a slow Internet !!!
3. You do not have to wait for an update that can be performed at any time during the next startup.
- 4 The program can be reached by clicking the left arrow more - image.B. both in Czech_English and German version

Image.A.

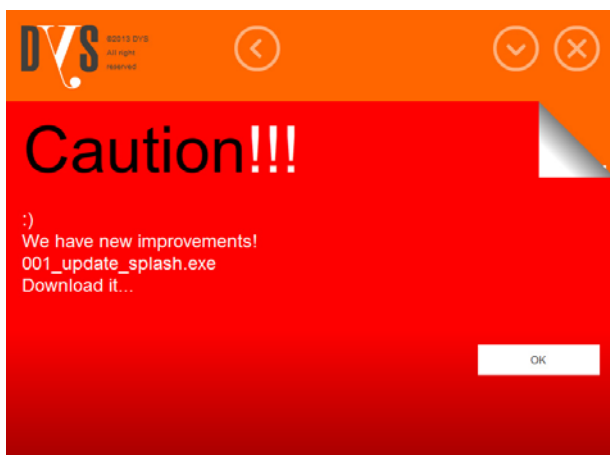

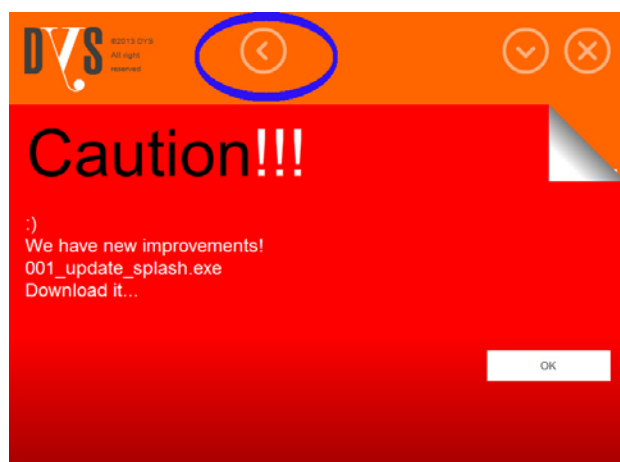

Image:B
